The world's smallest power assist wheelchair kit

# todo-i Power

## 01. The world's smallest power assist wheelchair

todo-i present smallest manual wheelchair that is packed with IoT features and power assist kit, which can prevent social isolation for the children with disabilities. todo-i provides the smooth comfort and freedom of driving an electric chair function and enables safe travel for our children wherever they want. It also includes various setting options enabling users to calibrate and control the device.

### Simplicity

todo-i can be convertible from manual to electric wheelchair easily by pull or push levers. Power on, push levers and control the joystick. For manual handling, just push the rims of the wheelchair as usual. It's as simple as that!

### A wide range of settings and options are available for all children

todo-i includes various control setting, which means you can calibrate and control the device with a smartphone, depends on the type and degree of disability in children. It has a range of the size from 220 to 380 mm in width and a variety of setting ranges according to the level of disabilities. You can even set up maximum speed and joystick sensitivity.

### The smallest size and lightest weight

todo-i is the world's smallest and lightest pediatric power assist wheelchair, which was never existed in the world. It is the same size as a manual wheelchair and can be stored in an ordinary car. Thanks to the size and the weight no need to use a special vehicle for traveling.

### Safe and Transportable power

A low-capacity, 0.9kg of removable and efficient lithium-ion battery can drive over 7 km, and it only requires 4 hours to charge. Travel the world with todo-i. It can be taken on anywhere because it is so compact and lightweight. The capacity of the aircraft is not limited, so no separate documents are required.
